

***Remember when doctors
made house calls?***

Transitions House Calls still does.

We're changing the way health care is delivered; by seeing you in your home when you need us. Let our nurse practitioner work with your primary care physician (PCP) to help keep you healthy and out of the hospital.

- We are NOT a replacement for your PCP.
- We help with medication reconciliation and compliance.
- We will help reduce unnecessary trips to the hospital.

***When was the last time your doctor
came to see you at home?***

Transitions House Calls will.

Our goal is to keep you healthy, and at home; whether you have just come from the hospital or an acute care facility or you just haven't seen your primary care physician (PCP) in a while. Let our nurse practitioner work with your PCP to keep you in good health.

- We are NOT a replacement for your PCP.
- We are NOT a home health agency.
- We WILL help reduce unnecessary trips to the emergency room.
