"It's able to infuse or push cosmeceuticals and/or drugs into the skin."

—Dr. Victor Ross - California

"You're going to be able to see results from cosmeceuticals that you couldn't see before because of the amount of product that was entering into the skin. The higher amounts of active ingredients that we can actually get into the cells that are deeper into the skin, the more you're going to see what those cosmeceuticals can really do. Vibraderm helps us achieve that as Physicians."

—Dr. Mark Youssef, California

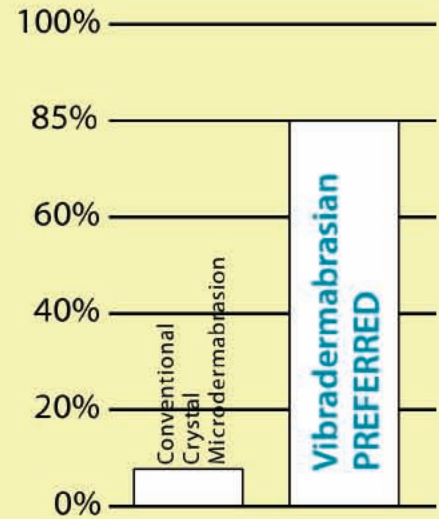

"We have a pre-laser Vibraderm. That's where we infuse BLT (numbing cream) prior to the laser treatment. We perform Vibradermabrasion prior to applying the numbing cream and we are numb in 20 minutes...tops. If we infuse it with Vibrafusion after Vibradermabrasion we are numb in 10 minutes, so it's a huge time saver!"

—Dr. Dima Ali, Virginia

"I think that the infusion technology is really unique. That's one of the things that I think is so incredible about this technology. You get this beautiful, new, rejuvenated skin and skin transformations that are really remarkable."

—Dr. Ruthie Harper, Texas

Study Showed Patients Prefer Vibraderm

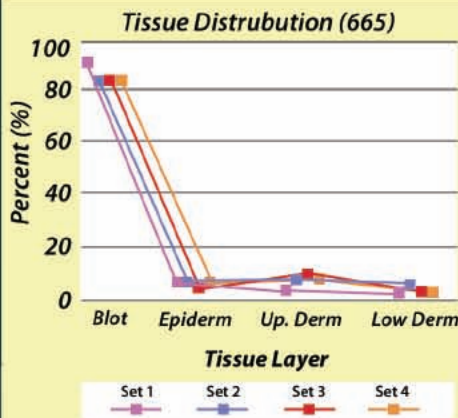

Typical ROI

2 NEW patients per week
3 months — system is paid for

Vibrafusion *The process of thorough infusion of topicals to shorten the skin cycle*

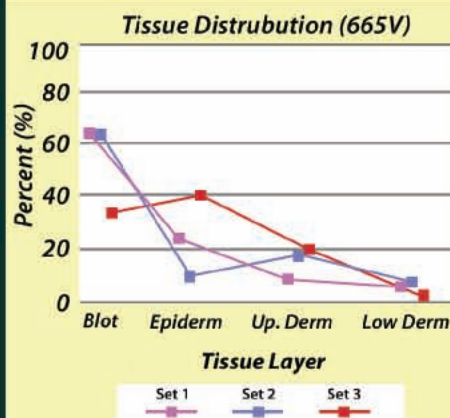

Vibraderm Science

WITHOUT VIBRAFUSION

There was little or no penetration through the skin in the different layers (epidermis, upper dermis, lower dermis).

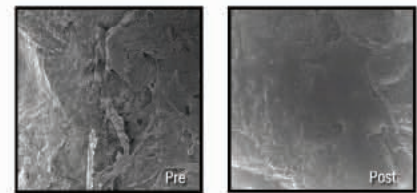

WITH VIBRAFUSION

There was penetration through the skin in the different layers (epidermis, upper dermis, lower dermis).

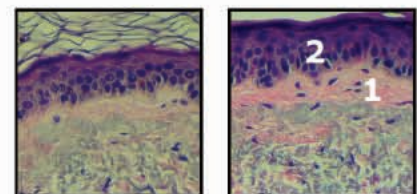

Study administered by Dr. Spencer Brown, UT Southwestern Medical Center, Dallas TX.

Vibradermabrasion (Exfoliation) *Vibraderm Science*

Short Term:

Your patient's skin will be noticeably smoother after one treatment with minimal erythema and no edema.

Longer Term Benefits:

Note: the new pink collagen (1) and the thickened epidermis (2).

VIBRADERM

Imagine. Skin Perfection.

Do you want a more youthful and vibrant appearance?

Ask about Vibradermabrasion using the **Vibraderm™ Skin Restoration System**. See and feel the difference after just one treatment. Notice the dramatic improvement in the tone and texture of your skin.

Vibradermabrasion is clinically proven to effectively exfoliate and produce **new collagen**. It also helps reduce fine lines, wrinkles, age spots, sun damage, acne and acne scarring.

Experience a relaxing and comfortable procedure using your own personal treatment paddles. Years of damage to your skin will disappear, leaving your skin looking healthier and more radiant.

With the Patented **Vibrafusion technology**, your favorite lotion or serum can be infused during the **VIBRADERM™** treatment.

Your skin will be so soft, smooth and polished you won't believe it.

Real Patients Real Results

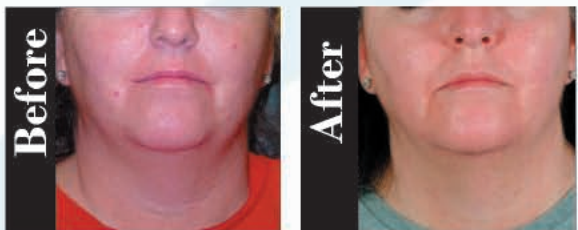

Skin texture treatment: Results after five treatments.

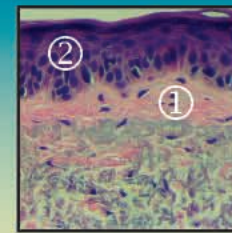

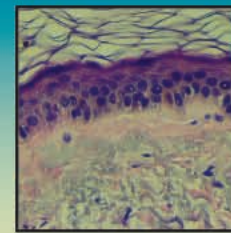

Pigment discoloration treatment: Results after five treatments.

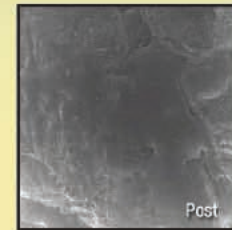

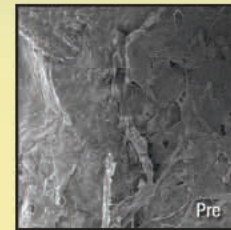

Skin texture treatment: Results after five treatments.

Skin texture treatment: Results after five treatments.

After only three treatments, notice the new pink collagen ① and the healthier epidermis ②.

These images show the texture of the skin surface magnified 250 times. Notice the smooth polished appearance of the skin after the treatment.

The Process

- ✓ Five comfortable in-office exfoliation treatments
- ✓ Five in-office super infusion treatments

The Results

- ✓ Reduces inflammation and redness
- ✓ Reduces age spots and sun damage
- ✓ Reduces uneven pigmentation
- ✓ Reduces adult and hormonal acne
- ✓ Produces rejuvenating collagen
